Table 2.1. Skills providers need to strengthen caregiver practices for nurturing care

**SKILLS FOR INTERPERSONAL COMMUNICATION**

For all caregiver-provider contacts
- Ask open-ended questions, listen attentively and observe interactions and practices.
- Praise and reinforce the efforts of families to care for their children.
- Identify family difficulties in providing care at home or using health services.
- Empathize with caregiver concerns and assist caregivers in solving problems through shared decision-making.
- Coach or guide caregivers in practising new skills, identify difficulties they might have and help solve problems.

**SKILLS TO SUPPORT CAREGIVER PRACTICES**

**For responsive caregiving**
- Observe cues as children interact with caregivers (e.g. expressions of hunger, discomfort, fear, needs for affection and interests).
- Observe the responses of caregivers to their children's cues.
- Engage caregivers in practising responsive interactions, starting before the child is born and continuing through the early years.
- Emphasize the importance of responsive caregiving to support children who are acutely ill or have chronic conditions, and help caregivers interpret and respond to their cues.
- Demonstrate responsiveness when asking about caregiver concerns.
- Model responsiveness with the child during the visit while weighing, immunizing or taking the child’s temperature. Actively engage, explain and respond to the child’s cues of fear and curiosity, and encourage the caregiver’s help.

**For opportunities for early learning**
- Identify existing and missed opportunities for caregivers to play and communicate with their young children at home.
- Counsel caregivers on how to start very early, even during pregnancy, to play and communicate with their young children.
- Identify developmentally-appropriate learning activities and use them to strengthen caregiver-child interactions.
- Model ways to praise and encourage caregivers in what they are doing well, and in trying out new tasks with their children.

**For safety and security**
- Help caregivers identify and correct environmental hazards to the child’s health and development in the home and in the community.
- Observe for signs of potential neglect and abuse of children and their caregivers, and follow reporting protocols when necessary.
- Help caregivers stop unhealthy behaviours such as smoking, alcohol or other substance abuse.
- Help caregivers establish routines for eating and sleeping.

**SKILLS TO SUPPORT CAREGIVER WELL-BEING**

**For supporting caregiver well-being**
- Listen to the caregiver(s) and build a trusting confidante relationship.
- Work together to understand how caregivers feel about their children and identify stressors the caregiver is facing.
- Demonstrate relaxation exercises and other practices that can help caregivers cope with stress.
- Support caregivers in problem-solving and develop approaches for dealing with family conflict.
- Connect caregivers to peer groups and other community resources to support their own well-being and that of their children.
