

## Strengthening Nurturing Care in Humanitarian Response Series

The previous two webinars discussed addressing young children and caregivers' needs in humanitarian settings, integrating nurturing care into health systems, and enhancing children's healthy development. This third webinar—**Discussion with Health Cluster Coordinators: Institutionalizing Nurturing Care in humanitarian health interventions**— builds on prior learnings and aims to facilitate health cluster coordinators' dialogue on integrating and monitoring early childhood development in humanitarian health responses and fostering inter-sectoral collaboration for sustainable actions that support nurturing care for children and caregivers during crises.
