# RWANDA ECD SCORECARD REPORT

---

**SECOND EDITION, 2022**

# PRESENTATION OUTLINES

1. Introduction
2. Objectives
3. Research methodology
4. Research Findings

# INTRODUCTION

- RGB is mandated to regularly monitor service delivery and compliance with the principles of good governance in public and private sector as well as in Civil Society organizations (CSO's);
- The ECD scorecard is a publication initiated by NCDA in collaboration with RGB that assesses the quality of ECD service delivery and the level of satisfaction of beneficiaries;
- Implementing entities: **NCDA, RBC, WB and RGB;**

# OBJECTIVES

- To establish an evidence - based assessment of ECD integrated services in all districts in terms of quality of service delivery for efficiency, effectiveness and sustainability of the ECD interventions to inform policy makers;
- To devise strategies of strengthening capacity, service delivery and accountability of service providers to enhance beneficiaries' satisfaction;

# RESEARCH METHODOLOGY

# METHODOLOGY

- The second edition covered ECD interventions implemented from 2018 to 2022 at households, community and ECD settings levels in all 30 districts.
- The sample size is comprised of **4713** beneficiaries (parents of children aged 2 years and below, and 3 to 6 years old), **690** caregivers, **506** Homebased ECDs, **75** Community ECDs, and **102** Center based ECDs.
- For the entire scorecard there are:
  1. Nutrition (2 indicators, 19 variables)
  2. Health (4 indicators, 23 variables)
  3. WASH (2 indicators, 14 variables)
  4. Parenting Education (2 indicators, 10 variables)
  5. School Readiness (4 indicators, 18 variables)
  6. Child protection and inclusiveness ( 2 indicators, 9 variables)

## **Overall: 6 Pillars, 16 indicators, and 93 variables**

- Overall, the assessment comprised of scientific citizens' perception and experience survey, RGB assessment as well as hard institutional data collected from institutions working in the areas of early childhood development.

# METHODOLOGY (CONT'D)

**The assessment used primary data & secondary data.**

- **Primary data:**

- Physical observations of the assessed ECDs and
- Interviews with service providers/caregivers, and beneficiaries.

- **Secondary data:**

- Data from relevant institutions (MoH & NCDA).

## DESCRIPTION OF PILLARS

- **Nutrition:** Captures the extent to which maternal and child healthy nutrition has improved on one hand; and further, the extent to which malnutrition and stunting has reduced. It also assess the achievement levels of the Nutrition Sensitive Direct Support (NSDS).
- **Health:** Captures the extent to which maternal and child mortality has gradually reduced, while presenting level of service delivery in diseases prevention and control, family planning, and ante and post-natal care related services.
- **Water, Hygiene and Sanitation (WASH):** Measures the satisfaction of ECD beneficiaries with regards to their access to safe and drinking water and hygiene & sanitation services.

## DESCRIPTION OF PILLARS (CONT'D)

- **Parenting education:** This measures the knowledge, and practice of parents in parenting and early stimulation and also the parents' participation in health care of child, nutrition, positive parenting, and hygiene and child preparedness for school.
- **School readiness:** measures enrollment and attendance of children aged between 3 to 6 years. It also assesses the level of service delivery of ECD integrated services including infrastructure and equipment at ECD settings. In addition, it evaluate the effectiveness of ECD leadership and management committees.
- **Child protection and inclusiveness:** measures the parents' awareness on child's rights, satisfaction, and participation in child protection and inclusiveness.

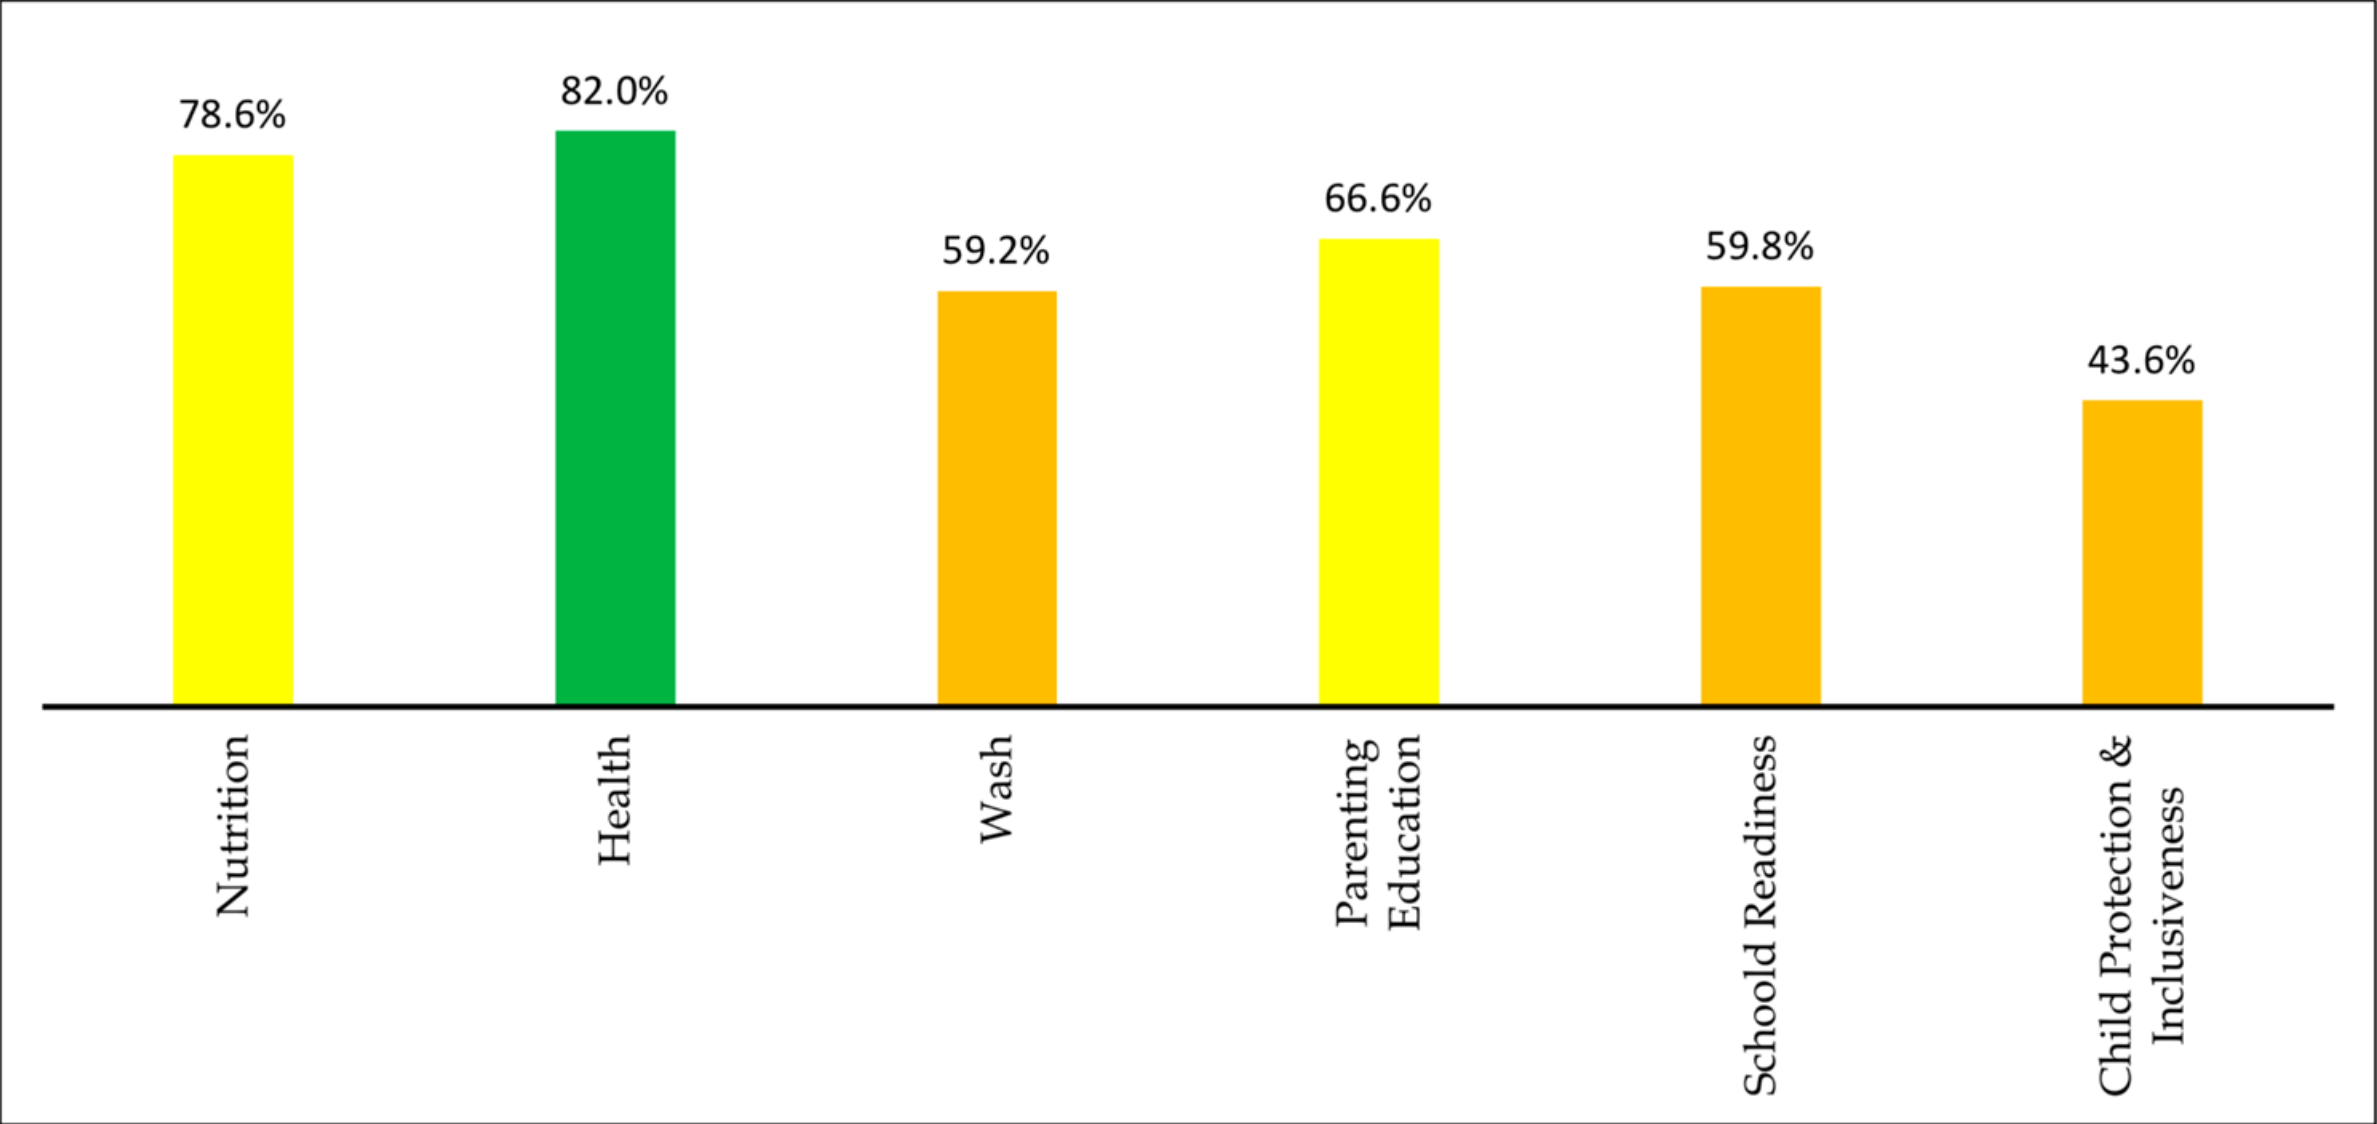

# SCORING SYSTEM OF ECD SCORECARD

The following are the scoring system:

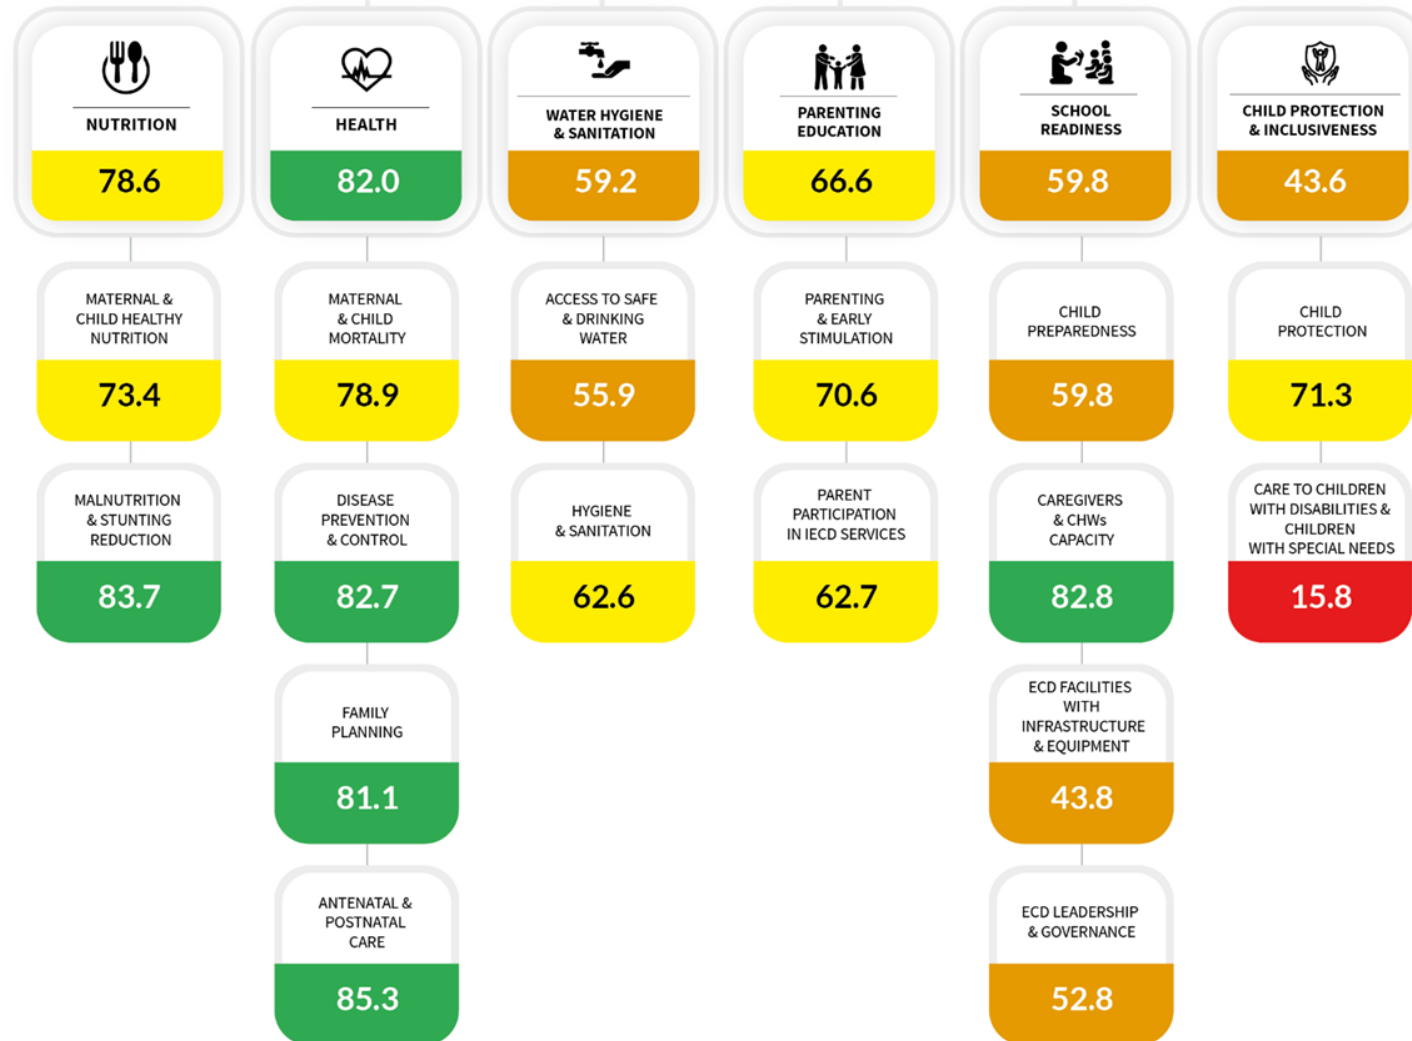

Scores	Rank (In Colors)
0 - 39.9	Red
40 - 59.9	Amber
60 - 79.9	Yellow
80 - 100	Green
